SUMMARY

Software Developer experienced in building scalable software solutions and mobile applications. Skilled in application development, API integration, database management, authentication, payment gateway. Experienced across the software development lifecycle, with a focus on delivering reliable, user-centric solutions in Agile environments.

EXPERIENCE

Software Developer

January 2025 - Present

AlphawareNext Technologies Pvt. Ltd., Mumbai

- Developed and maintained scalable software applications with a focus on performance, reliability, and user experience.
- Built and integrated REST APIs, authentication flows, and dynamic application features using modern development technologies.
- Developed responsive frontend interfaces and implemented efficient state management for seamless application functionality.
- Integrated backend services and databases as well as published well-optimized mobile applications.

KEY PROJECTS

1. OTT Streaming Application

Developed a **cross-platform OTT streaming application** using React Native and TypeScript for content discovery and video consumption. Implemented content categories, search, media-detail screens, video playback, authentication, REST API integration, reusable components, and **performance optimizations for media-heavy experiences**.

2. Customer Support Application

Developed a **multi-tenant customer support platform** for managing tickets, agents, customers, and knowledge bases. Built REST APIs, responsive React dashboards, ticket assignment workflows, and an embeddable **React Support SDK** distributed as an npm package, using Node.js, Express, MongoDB, and TypeScript.

3. Agentic AI Application

Developed a full-stack **Agentic AI application** that enables AI agents to plan and execute multi-step tasks using tools, APIs, and contextual information. Built agent management, task workflows, tool execution, conversation state, real-time execution updates, and scalable backend services using React, TypeScript, Node.js, MongoDB, and AI/LLM integrations.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python
- **Frontend:** React JS, React Native, Tailwind CSS, Zustand
- **Backend & Database:** Node JS, Express JS, MongoDB, Mongoose, Redis, Qdrant, WebSocket
- **Artificial Intelligence:** Vector Databases, Vector Search, RAG, AI Agents, LLMs, Ollama
- **Tools & Development:** Git, Github, VS Code, Postman, Docker

EDUCATION

Master of Science Information Technology, S. K. Somaiya College, Vidyavihar

2023 -2025

Relevant Coursework: Big Data Analytics, Machine Learning, Natural Language Processing

Bachelor of Science Information Technology, Mumbai University

2020 - 2023
